Recommended for Teachers: Math & Science

Teaching with Spatial Technology

(TwIST), is designed to provide grades 6-12 teachers with meaningful and challenging lesson plans about using Geographic Information Systems (GIS) and Global Positioning Systems (GPS) in the classroom. TwIST is a week-long workshop intended to provide the participants with basic proficiencies about some of the many aspects of spatial technology which is growing in importance in this global environment.

Course Date & Location:

June 16 - June 21, 2024

Ferris State University
(Big Rapids, MI)
